Biometrics is, literally, “measurements of life”. They consist of *“automated methods of identifying or verifying the identity of a person based on one, or more, physiological or behavioral characteristic(s).”*

Biometric Voice Verification Technologies

FOR IMMEDIATE RELEASE

Leading Telecom Selects VoiceVantage™ Biometrics Solution

Boston, Massachusetts. (October 10, 2018) Frances M. Lynch, CEO of THC Technologies Corporation, a private corporation engaged in the global biometric solutions market, today announced, "Beginning with our initial sale way back in 2004 of 70,000 licenses to a North American market leader our highly secure voice verification products continue to be the premier voice verification choice worldwide. Our most recent selection by a leading telecom further enhances our leadership role.

Our extensive industry experience and the impressive VoiceVantage™ technology portfolio combined with our Partner’s proven innovative products and services offerings further insure each companies’ respective leadership positions in the voice verification and secure communications market.”

Tomas T. Wilkerson, THC’s VP of Marketing concurred saying, "Organizations worldwide in financial services, corrections, healthcare, government and many other industries maximize performance and provide investment protection because THC and our partners provide them complete best-of-breed voice authentication solutions. We focus on designing, developing and deploying voice solutions with our partners sharing the common goal to create best-of-breed hardware and software configurations on which to deploy their industry specific solutions.”
