FOR IMMEDIATE RELEASE

THC Announces Year over Year Sales Growth in the Fortune 500 and International Corrections Markets

Boston, Massachusetts. (September 7, 2016) THC Technologies Corp a private corporation engaged in the global biometric solutions market, today announced it has experienced considerable sales growth of its VoiceVantage™ voice verification software within the corrections telecommunications market.

THC CEO Frances Lynch said, “The market for correctional telecommunications exceeds \$3.5 billion per year in the Americas alone and THC continues to enjoy recognition as the industry’s inmate voice verification leader. Demand for our highly secure voice verification software continues to increase exponentially. Our inmate voice verification installations have increased our overall sales volume year over year for the past two years.

In addition, Fortune 500 Institutions in the international financial vertical have continued to rely on and increase their use of our technology. THC and its Partners design, deploy and support advanced voice verification solutions worldwide. THC provides the core proprietary voice verification solutions Partners deploy to secure software applications, often at military grade, for multiple security markets including the correction sector. “

Tom Wilkerson, THC’s VP of Marketing concurred saying, “THC is the obvious choice for our Partners and clients as they address today’s secure communication challenges. Our advanced security products in combination with our Partner’s expertise offer innovative solutions positioning us to capitalize on the substantial corrections market opportunity worldwide.

Organizations in public education, financial services, healthcare, government and many other industries maximize performance and provide investment protection because THC and our partners deliver complete best-of-breed voice authentication solutions. We focus on designing, developing and deploying voice solutions with our partners sharing the common goal to create best-of-breed hardware and software configurations on which to deploy their industry specific solutions.”
